

COM 2097 : Elective: Research

The elective Research clerkship is a 4-week course. The purpose of the Research elective is to provide meaningful research experiences for medical students, with the expectation that students will gain initial experience and interest in research that will carry over into the practice of medicine. The goals of the Research Selective are to provide students an opportunity to participate in an ongoing research project, to create a greater appreciation for clinical, basic science, or medical education research, and to introduce future physicians to good research practices.
