

Clerkship Scheduling Process / SmartMatch

Clerkship Scheduling Process

Spring Semester of OMS II

- CORE opens for specialty or region applications
- Specialty applications submitted and reviewed
- Smart Match [computerized algorithm for optimal rotation scheduling and preferences]
- Preceptor schedule confirmations
- Student schedules released
 - Change request submissions may be submitted and reviewed
- Clerkship schedules released
 - 30-45 days before the first rotation

Clerkship SmartMatch

The Community Clinical Education staff facilitate a system whereby each student will preference their selections of various clerkship training locations and preceptors in a fair manner. As part of the process, students will be surveyed in the OMS-II year for their input into the desirability of rotation locations and educated on the upcoming process. While preferences will be considered, they are not guaranteed.
