

Immunization Compliance

Students are required to maintain and update proof of current immunizations before beginning and while participating in clinical rotations. Additionally, infection control policies at clinical clerkship sites require that students entering these facilities for training purposes are in good health.

Students must complete the CHSU Immunization Record and upload all immunization documentation via “My Record Tracker” for verification. The CHSU Immunization Record may be obtained in CORE ELMS>Requirements.

Students not complying with CHSU-COM's immunization policy will not be allowed to start and/or continue clinical rotations. Students out of compliance may be suspended from clerkship.
